

KeyDate

Owning a home isn't impossible.
It has a date.

WHY I BUILT THIS

I bought my first place.
I was guessing the whole way.

Spreadsheets

Contradictory advice

A goal that kept moving

Nobody could tell me when.

- How much do I actually need?
- Am I even close?
- Is this the year, or five years away?

AND I HAD IT EASIER THAN THE PEOPLE BEHIND ME

One generation apart

SO I BUILT THE THING I NEEDED

Sixty seconds in. A real date out.

- 1 Three questions
- 2 A real month
- 3 Watch it get closer

Real screen, real plan

We changed the question

EVERY OTHER TOOL

“Afford it today?”

No.

KEYDATE

“When?”

June 2029.

IT WAS NEVER JUST MY STORY

The engine doesn't change at the border

Rent vs. buy

Buying isn't always the better money move. Here's an honest 5-year comparison for a \$465K place vs. renting and investing the difference.

Renting + investing wins

Over 5 years, renting and investing the difference leaves you about **\$47K** better off. At this rent and price, tying up cash in this home isn't the stronger money move — renting longer (or targeting a cheaper place) may be smarter.

A new country is a rulebook, not a rebuild.

It just doesn't have
a date yet.

We're giving it one.
